

2008-2009 Diversity Report Card Special Publication #1: Undergraduate Students

University
of New
Mexico

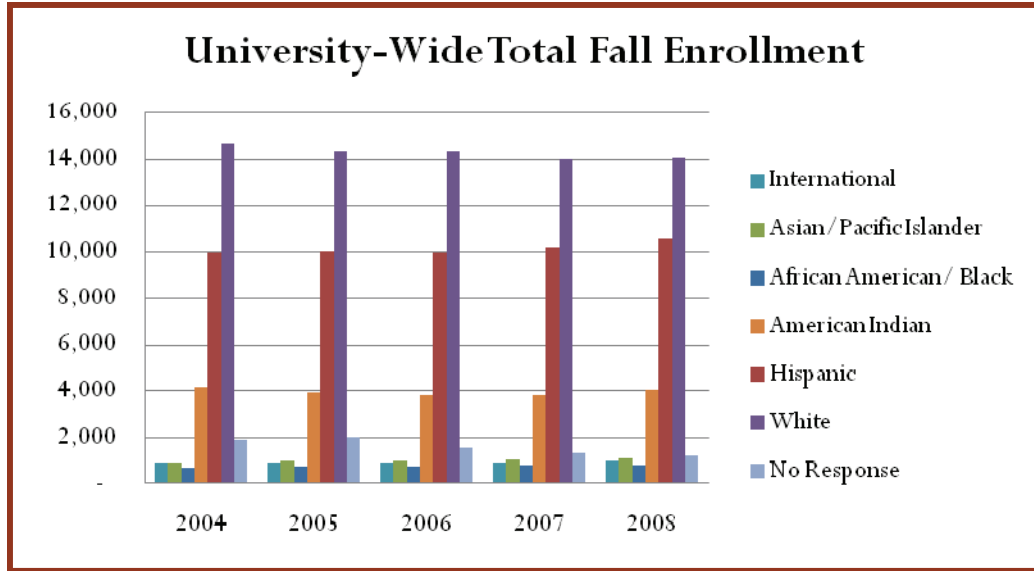

Student enrollment is a snapshot of the University of New Mexico demographics as a whole. The university community is quite diverse, but it does not mirror the demographics of the state of New Mexico. The Student body of UNM is minority-majority—just like the state. In this publication we will look at student enrollment demographics in more detail. As you can see, this university-wide snapshot depicts a very diverse student body which is reflective of the progress and commitment made to fulfill the institutional mission of access and success for all students.

Undergraduate Graduation Rates

Another indicator of student success is the rate of student graduation. The measurement presented below is the percentage of the cohort of freshmen entering in 1999-2002 who had graduated by the end of six years. For example, the graduation rate for the 2002 entering freshmen cohort is the percentage who had graduated by spring, 2008.

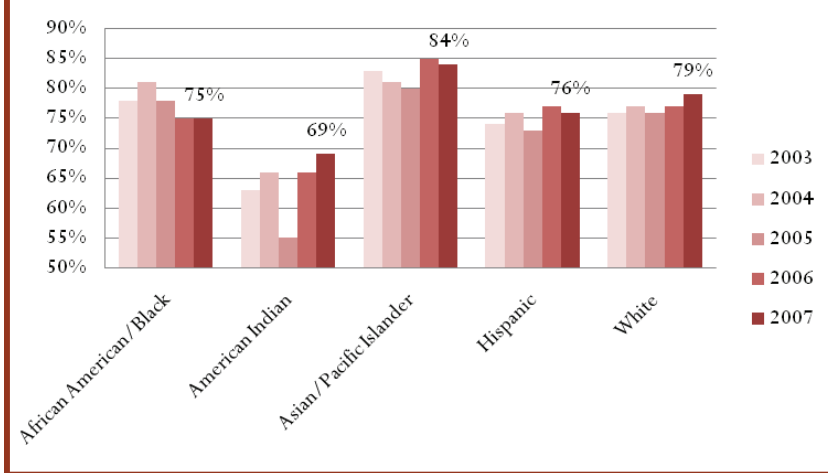

Graduation Rate

	1999	2000	2001	2002
Females	44%	45%	47%	48%
Males	36%	39%	39%	38%
African American	26%	30%	30%	34%
American Indian	29%	27%	21%	29%
Asian/Pacific Islander	48%	42%	45%	47%
Hispanic	39%	41%	40%	41%
White, non-Hispanic	44%	47%	50%	47%

Freshmen Retention

Freshmen Retention: Ethnicity

Freshmen retention is a primary indicator of student success. High retention is reflective of the students' needs being met and their successes driving their commitment. The measurement presented below is the percentage of entering cohorts enrolled for their third semester. For example, the 2007 entering cohort retention is the percentage that enrolled for fall 2008. The total number of the cohort entering each year is presented above the retention rate of that cohort. Note that this includes full-time freshmen only.

The difference between undergraduate and graduate enrollment by ethnicity is presented below. One immediately noticeable disparity is that of Hispanic students, representing 36% of all undergraduate students and only 20% of all graduate students. Also important to note is that while there are very few international undergraduate students, they make up 10% of graduate students.
